

Exploring MVC 6 & ASP.NET 5

Prabhakar Mishra, Product Manager, GrapeCity Inc.

GREAT INDIAN
DEVELOPER
SUMMIT

A circular icon representing a globe, composed of a grid of small dots in a light purple color, positioned between the words "DEVELOPER" and "SUMMIT".

Agenda

- What is ASP.NET 5
- Exploring MVC 6
 - Web API & MVC
 - TagHelpers

ASPNET 5

- Optimized for Cloud and on premise servers.
- ASP.NET MVC and Web API have been merged into a single programming model.
- New JSON based project structure.
 - No need to recompile for every change. Just hit save and refresh the browser.
 - Compilation done with the new Roslyn real-time compiler.
- Dependency injection out of the box.
- Side by side deployment of the runtime and framework with your application.
- Open Source via the .NET Foundation and is taking public contributions.
- Also runs on Mono, on both Mac and Linux.
- Everything packaged with NuGet, Including the .NET runtime itself.
